

Asian Elements: Natural Balance in Eastern Design

Presenting a range of interior design possibilities, Asian Elements goes beyond the motifs of a particular country or style. Showcasing interiors from Sri Lanka, Thailand, Bali, Japan, Vietnam, Singapore, and other locales, the book covers many styles, all in tune with the contemporary desire for clean lines, a sense of balance, and the use of natural materials. The author looks at five key elements of Asian decorating. Air focuses on space and light; Earth explores Asian gardens; Water looks at bathrooms and waterside homes; Fire includes kitchens, tableware, and metal, glass, and ceramic materials; and Wood presents living and sleeping rooms. Jane Edwards text is based on interviews with owners, architects, and craftspeople. 200 full-color photographs are included.
