

The Human Aura and the Significance of Color (Classic Reprint)

The Human Aura the general public can hardly stand prepared to judge the merits of any statements, because few people, comparatively speaking, have sufficient experimental acquaintance with interior or greatly extended vision to enable them to testify to the accuracy or inaccuracy of any declarations based on psychic perception alone; but, as in the case of the color side of the question, every one is at full liberty to test the effects produced by various colors upon human beings, animals and vegetables, and also to observe the influence of color in modifying atmospheric temperature, what might otherwise appear to be a very abstruse and entirely occult subject soon becomes a matter for world-wide investigation and demonstration. The Human A ura, though visible only by the aid of clairvoyance, is palpably discerned or felt by millions of people who know nothing of psychic science or of the development of unusual perceptions. And though this aura, which surrounds every living organism, is vaguely described as magnetism by a great many people who have given some attention to it, that word, having a distinct technical meaning in other departments of scientific research, does not very properly describe exactly what we mean by auric effluence or radiation.(Typographical errors above are due to OCR software and dont occur in the book.)About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text. Read books online for free at www.forgottenbooks.org
