

Education (Classic Reprint)

Excerpt from Education To sustain the thoughtful, and through their influence, awake if possible to a higher sense of duty such of the People as would for a mess of pottage either alienate their rights and privileges of citizenship - or, as the merest slaves of a rude materialism, blot out the divine image of their moral nature. And, on the other hand to strengthen the arms of him, who would aspire to a higher position for himself and his offspring than that of the Canaanite - and aim at securing for them a good education, one of the choicest blessings that can fall to our lot in this life, conducive alike to his own happiness and the welfare of the State, is the leading principle of the context: the groundwork of which will be found in Willms Education of the People, enriched by the practical views in a condensed form of our English Classic and contemporary literature. Now we are not of opinion with those School Boards and their supporters - upon which almost every interest, save that of the purely educational is represented, - that Education is the universal panacea for all the ills that flesh is heir to.
